WORK EXPERIENCE

Web Developer

Nov 2015 - present

Lockstate, Denver (remote), full-time

Full stack web developer. Working on all parts of company's product, a distributed service web application.

Technologies: Ruby on Rails (backend), React.js (frontend), Ansible (server provisioning), gRPC (distributed service communication), Ruby C extensions (integrating Ruby with C libraries).

Key projects:

- (Jan 2016 - Sep 2016) Application rewrite, new JSON API, collaborated with other developers.
- (Jan 2017 - Oct 2017) Distributed service for the Mercury ACS product, an app that uses Ruby C extensions.

Web Developer

Dec 2012 - Jun 2015

Ideal Project Group, Chicago (remote), full-time

Full stack senior web developer working for startups and enterprises.

I'm most proud with my work on the mobile-optimized web application for a corporation in the RV and camping industry. There I implemented complex business logic for various modules and the MiraPay payment gem that reliably processed millions of dollars in orders for the company. On this project I worked as a developer and project tech lead since March 2013.

Key projects:

- (Dec 2012 - Jun 2015) Web app for the camping industry corporation: business representative and administrator modules, mobile (iPad) optimization. Technology stack: Ruby on Rails, Redis, Memcached, Postgresql, Backbone.js.
- (May 2014 - Jun 2014) Ruby gem for the MiraPay payment processor API. Web app payment integration with MiraPay.

Web Developer

Dec 2011 - Jun 2012

Freelance, part-time

- (Jun 2012) Implemented JSON API for iPhone app for "Kolajna ljubavi" (Croatian NGO). Technology stack: Ruby on Rails, Postgresql, deployment to Heroku.
- (Apr 2012 - May 2012) Implemented JSON API for "Partycrasher" iPhone app, side project. Technology stack: Ruby on Rails, Postgresql, deployment to Heroku.
- (Dec 2011 - Jan 2012) Full stack web application prototyping for Quirkweek ltd (Chicago, remote). Technology stack: Ruby on Rails, Javascript (jQuery), Postgresql, deployment to Heroku.

System Integrator & Developer

Jul 2011 - Nov 2012

Ericsson Croatia, full-time

Worked on Ericsson 'File & Event - Multi Mediation' system (EMM). EMM is a node in a telecommunication network standing between the core network and billing systems. Programming for EMM in 'DUP' language, Solaris system administration.

Projects:

- (Sep 2011 - Oct 2011) Business logic development and integration for Crnogorski Telecom (Montenegro).
- (Nov 2011 - May 2012) Business logic development for BH Telecom (Bosnia and Herzegovina).
- (Jun 2012 - Jul 2012) EMM integration for Telefonica (Germany).
- (Aug 2012 - Nov 2012) Maintenance, 3 projects doing business logic upgrade for Maktel (Macedonia).

Founder

Jan 2011 - Jul 2011

Lansiraj, full-time

Created Lansiraj, a service for connecting web developers and creatives with clients in Croatia.
Technology stack: Ruby on Rails, Javascript (jQuery), Postgresql, deployment with Capistrano.

Google Apps Consultant

Oct 2010 - Dec 2010

Plethora Projekt, full-time

Worked on a project to implement Google Apps for a private high school "Gimnazija Dubrovnik".

Consultant

Aug 2009 - Sep 2010

IBM Croatia, full-time

Worked on 'eSpis Rollout' project with the goal of informatization of the Croatian judiciary system. I was a part of the team that implemented the eSpis application in 60 courts throughout the Croatia. I also worked on the project manager's team and was responsible for IBM internal finance tracking for the project.

EDUCATION

Faculty of Electrical Engineering and Computing

2003 - 2008

University of Zagreb, Croatia

Achieved a master's degree in electrical engineering with a major in Industrial Electronics. I did my final paper in the field of face detection and face recognition in video sequences.
